-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Gee (5,405,013). Gee '013 discloses a packaged product comprising: a plurality of flexible water soluble liquid-filled pouches; an outer container for containing the liquid-filled pouches; wherein the outer container contains a plurality of flexible liquid-filled pouches whereby at least two or more of the flexible liquid-filled pouches are in mutual contact, and wherein the outer container further comprises means for avoiding or minimizing rupture of the flexible liquid-filled pouches when the outer container is subject to shock. See Figure 5 embodiment.

With respect to claim 3 note the polymeric overwrap bags, see column 3, lines 39-46 which can be shrink-wrapped or vacuum packed. The product-by-process limitation in claim 4 results in no structure that is different from Gee '013.

With respect to claim 5-7, note the corrugated cushioning triangular perimeter cells.

With respect to claims 8 and 10, Gee '013 discloses that the outer container can be made of plastic which can be thermoformed or molded by injection. The product-by-process limitation in claim 4 results in no structure that is different from Gee '013.

Art Unit: 3728

3. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dull et al. (5,645,169). Dull '169 discloses a packaged product comprising: a plurality of flexible water soluble liquid-filled pouches; an injection molded plastic outer container for containing the liquid-filled pouches; wherein the outer container contains a plurality of flexible liquid-filled pouches whereby at least two or more of the flexible liquid-filled pouches are in mutual contact, and wherein the outer container further comprises means for avoiding or minimizing rupture of the flexible liquid-filled pouches when the outer container is subject to shock. See Figures 1-15 embodiments.

With respect to claim 3 note the film cover layer (45) enclosing the pouches by heat sealing. The product-by-process limitation in claim 4 results in no structure that is different from Dull '169.

With respect to claim 5-7, note the corrugated cushioning outer sleeve (30) in Figure 3 embodiment, which will minimize rupture of the flexible liquid-filled pouches when the outer container is subject to shock.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gee '013. Gee '013 is silent about the outer container having a recloseable lid. Rigid containers used to ship products are known to have recloseable lid for better protecting the content

Art Unit: 3728

therein. Official notice is taken that it is well known in the art to provide outer containers with lid to better contain the product therein.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are package products analogous to applicant's instant invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jila M Mohandesi whose telephone number is (571) 272-4558. The examiner can normally be reached on Monday-Friday 7:30-4:00 (EST).
